Richard, Jae, and others:

On the front page of the July 29 issue of Capital Press newspaper is an article about a \$90,000 fine by PARC for wheat damage done by long-range aerial spray drift.

If any of you involved in our study have not read that article and familiarized yourselves with the case, I urge you to do so. This is an example of long-range aerial drift that PARC acknowledges happened due to a conspiracy of wrong weather conditions etc.

ALSO: In the test data from Dr Barr, though all 34 tested positive, there was a BIG difference in quantity in married couples depending on who was home all day during the spray in question and which spouse was in town at work etc. Example: I was home and outside most of the day when nearby aerial spray of atrazine occurred and Neila was gone much of the day. My level was WAY higher than hers, and that same pattern is seen in other examples. Thus, I have the following question: In your current testing have you asked questions to try and identify which participants are away from home most work days and which generally are at home? That's important. -- Day Owen

Subject: Re: AIR TESTING IS GETTING SET UP

Maya,

Would you be willing to share your sampling plan? It would be helpful to know which herbicides you are targeting, how long the sampling devices will be deployed, and what method the lab is going to run to analyze the samples.

Richard

CAPT Richard R. Kauffman, M.S.
Senior Regional Representative
Agency for Toxic Substances & Disease Registry

RKauffman@cdc.gov

TE-QMA4 micro-quartz media

TE-1009...glass cartridge w/ steel screens.

Will be set up by a professional,all done legitimately.

We'll have a base sampling done first.

We are looking forward to share this information with you!

Thanks,

Dan and Maya

p.s. We are taking charge to test the most important element ,since we know that AIR is the MAIN pathway that our families are being sickened by the constant low pesticide exposure ,through revolatalization of poison soaked mountains,even months and years after so called spray "season".
